PROJECTS OF SAG "KABEL"; (3 pp; German; November 1950)		

25X1X

This document consists of two tables. The first, covering two pages and dated 24 November 1950, is a draft of a supplemental plan for the research and experimental work to be done by the Soviet Corporation (SAG) "Kabel" in 1951-52 for the Ministries of the USSR (according to orders from the Ministries dated 15 November). The projects listed are:

- A. 12-ray oscillograph
- 2. 4-ray oscillograph
- 3. single-circuit oscillograph
- 4. zirconium lamp
- 5. impulse light source
 6. electric furnace to fire very large steatite insulators
- 7. carbon-filament electrodes for metals microphotography
- 8. small heavy-duty storage battery
- 9. AC bridge for frequencies of 400 100 cycles, combined with an a-f oscillator, a filter, and a measuring device
- 10. electrodynamic voltmeter
- 11. AC voltmeter
- 12. generator test stand.

The second table, one page, dated 25 November 1950, lists projects abandoned or interrupted prior to 1 October 1950. These projects are:

- 1. a starter mechanism for cranes
- 2. ferrograph for measuring magnetic current
- 3. heterodyne wavemeter
- 4. condensers.

Both tables are marked "translation" (presumably from Russian). There is no indication as to the office or agency which prepared them, except that the first one indicates that the original was signed by two Soviet officials of SAG "Kabel".
